AUSWET 600

WETTING AGENT

ACTIVE CONSTITUENT: 600g/L NONYL PHENOL ETHYLENE OXIDE CONDENSATE

A NON-IONIC SPREADER ACTIVATOR FOR
AGRICULTURAL SPRAYS AS SPECIFIED IN THE
DIRECTIONS FOR USE TABLE.

Proudly Australian

Pack Size/ Label Component	APVMA Approval Number
5 Litres	60567/5L/0206
20 Litres	60567/20L/0206

DIRECTIONS FOR USE

HORTICULTURAL SPRAYS: Add AUSWET 600 Wetting Agent at 10mL per 100L of spray (2mL per 15L knapsack). AUSWET 600 Wetting Agent is recommended for addition to all horticultural sprays except those known to include adequate wetting agent in the formulation. Increased activity will be obtained by increasing the rate for waxy leaved plants which are normally hard to wet. It is important to spray only to the point of wetness. Excessive use of wetting agents can cause run-off of active ingredient with consequent loss of efficiency.

WEED KILLING SPRAYS: AUSWET 600 Wetting Agent should be added to all post-emergence herbicide sprays to increase their efficiency except those which are known to contain adequate wetting agent in the formulation. Wetter should be added only where directed on individual labels as use with selective herbicides outside label directions may reduce crop selectively. For foliar active herbicides, spray to the point where leaves and stems are just wet. Spraying beyond this will encourage run-off, with obvious loss of spray chemicals. When spraying waxy or hairy leaved plants which are normally hard to wet, increased activity will be obtained by increasing the rate of AUSWET 600 Wetting Agent. It is important that the leaves and stems are thoroughly wetted for foliar herbicides to work efficiently, particularly when treating dense, tall vegetation.

TYPE OF EQUIPMENT	QUANTITY OF AUSWET 600 WETTING AGENT TO ADD TO SPRAY
High volume power spray	12mL/100L
Low volume boom spray	60mL/100L
Misting machines	5mL/5L
Knapsack	2mL/15L

PARAQUAT AND DIQUAT (E.G. REGLONE®, GRAMOXONE®, SPRAY.SEED®): For the maximum efficiency of these contact herbicides a higher rate of AUSWET 600 Wetting Agent must be used to ensure even and thorough coverage of plant foliage and to increase absorption. This is particularly important for killing grasses and tall, dense vegetation.

TYPE OF EQUIPMENT	QUANTITY OF AUSWET 600 WETTING AGENT TO ADD TO SPRAY
High volume power spray	200mL/100L of spray
Misting machines	200mL/100L of spray
Knapsack	30mL/15L of spray

SOIL RESIDUAL HERBICIDES: When applying soil active herbicides such as Diuron or Atrazine to standing weeds, add AUSWET 600 Wetting Agent to thoroughly wet foliage. Rates will range from 125mL - 500mL per 100L depending on product used. Consult product labels for individual recommendations and restrictions.

FIRE FIGHTING: AUSWET 600 Wetting Agent is an efficient aid to fire fighting. It increases the wetting power of water which assists in quick control and mopping up of fires.

TYPE OF EQUIPMENT	QUANTITY OF AUSWET 600 WETTING AGENT TO ADD TO SPRAY
Water Tanker	10mL/100L of water
Knapsack	2mL/15L of water

NOT TO BE USED FOR ANY PURPOSE OR IN ANY MANNER CONTRARY TO THIS LABEL UNLESS AUTHORIZED UNDER APPROPRIATE LEGISLATION.

GENERAL INSTRUCTIONS

AUSWET 600 Wetting Agent is a spray additive designed for use with fungicides, insecticides and weed killers. AUSWET 600 Wetting Agent increases the activity and efficiency of pesticides and herbicides. It increases wetting and improves spray coverage. AUSWET 600 Wetting Agent can be used with alkaline sprays and mixes easily with all types of water. It will not injure the most tender foliage if used as directed.

Spray only to the point where leaves are just wet. Spraying beyond this will encourage run-off, with obvious loss of spray chemicals.

MIXING INSTRUCTIONS

AUSWET 600 Wetting Agent mixes easily and quickly with water and should be added direct to the spray tank. It should not be added direct to undiluted sprays containing wetting agents.

PROTECTION OF WILDLIFE, FISH, CRUSTACEANS AND ENVIRONMENT

Harmful to fish. DO NOT contaminate ponds, streams, rivers or waterways with the chemical or used containers.

STORAGE AND DISPOSAL

KEEP OUT OF REACH OF CHILDREN

Store in the closed, original container in a cool, well ventilated area. DO NOT store for prolonged periods in direct sunlight. Triple or preferably pressure rinse containers before disposal. Add rinsings to spray tank. DO NOT dispose of undiluted chemicals on site. If recycling, replace cap and return clean containers to recycler or designated collection point. If not recycling, break, crush or puncture and bury empty containers in a local authority landfill. If no landfill is available, bury the containers below 500mm in a disposal pit specifically marked and set up for this purpose clear of waterways, desirable vegetation and tree roots. Empty containers should not be burnt.

SAFETY DIRECTIONS

May irritate the eyes and skin. Avoid contact with eyes and skin. When using or preparing product wear cotton overalls buttoned to the neck and wrist (or equivalent clothing), elbow length PVC/rubber gloves and goggles. If product is on skin, immediately wash area with soap and water. After use and before eating, drinking or smoking, wash hands, arms and face thoroughly with soap and water.

FIRST AID

If poisoning occurs, contact a Doctor or Poisons Information Centre **Phone: 13 1126** Australia wide. If skin contact occurs, remove contaminated clothing and wash skin thoroughly with soap and water. If irritation occurs seek medical advice.

MATERIAL SAFETY DATA SHEET

For further information refer to the Material Safety Data Sheet (MSDS) which is available from the supplier.

CONDITIONS OF SALE

AUSWET 600 is supplied as a high grade product and is suitable for the purpose which it is expressly intended and must be used in accordance with the directions for use. Because Grevillia Ag has no control over handling, storage or use of AUSWET 600, the business makes no express or implied representations or warranty (other than non excludable statutory warranties). This product is sold on the condition that the buyer and/or user assumes all risks of the handling and use of AUSWET 600 as well as the results obtained from its use.
