PRO-KLEEN GRANULAR

PESTICIDE DECONTAMINANT

ACTIVE CONSTITUENTS: 80g/Kg AVAILABLE CHLORINE; 270g/Kg SODIUM HYDROXIDE;
220g/Kg SODIUM TRIPOLYPHOSPHATE

A PROPRIETRY PESTICIDE DECONTAMINANT THAT WILL SUCCESSFULLY
DECONTAMINATE VIRTUALLY ALL PESTICIDES INCLUDING
SULFONYLUREA AND PHENOXY BASED HERBICIDES.

- * MULTI-FUNCTIONAL
- * LONG SHELF LIFE
- * CONCENTRATED FORMULA
- * COST EFFECTIVE
- * CONVENIENT

Proudly Australian

DIRECTIONS FOR USE

CHEMICAL TYPE	SITUATION	USE RATE	PROCEDURE
Non-Persistent Chemicals	Spray tanks, hoses and all other spray equipment.	100gm per 100L	Step 1. Clean spray equipment immediately after spraying is completed. Step 2. Hose down outside of the tank, otherwise herbicide adhering to the outside could contaminate the unit again after it has been cleaned. Step 3. Drain the tank, then flush tank, boom and hoses with clean water for a minimum of 10 minutes. Step 4. Half fill the tank with clean water and begin agitation. Step 5. Remove filter basket in top of tank. Step 6. Measure out the required amount of PRO-KLEEN GRANULAR either by using the measuring cup provided which holds 50gm when full or by using a dry clean measuring jug. Note that 1gm of this product equates approximately to 1ml by volume. For more precise measurement use a set of electronic scales. Step 7. Replace lid on product firmly immediately after measurement to ensure that product is kept dry at all times. Step 8. Slowly add PRO-KLEEN GRANULAR through top port of tank. Step 9. Replace the filter basket in top of tank and fill the tank with water. Agitate and circulate the solution through all lines. Run the sprayer to fill the boom. Step 10. Agitate vigorously for 15 minutes and recirculate. Step 11. Use hand lance or return hose to clean the top of tank and around the filter basket. Care should be taken to wash out any indentations or ledges in the tank where herbicide could be deposited. Step 12. Open spray booms and spray out. Step 13. Repeat steps 4 - 12 above. Step 14. When sprayer is to be re-used immediately: The following procedure must be followed to ensure that any excess foam that may contain chlorine residue is completely removed from the tank. If this procedure is not carried out then the following chemical batch may be broken down to some degree as a result of the residual chlorine remaining in the foam at the base of the tank. a. Half fill the tank with water. b. Add 10ml/100L of a defoaming agent such as D-FOAM. c. Fill the remainder of the tank with water. d. Agitate for 5 minutes and recirculate before spraying out. If this procedure is done properly then there should be no further trace of the blue tracer dye (that is contained in PRO-KLEEN GRANULAR) in the wash water.
	Nozzles and screens/filters.	10gm per 10L	Remove and clean separately. Immerse in solution of PRO-KLEEN GRANULAR and allow to stand for 30 minutes. Remove any residue with a wire brush. Rinse in clean water before re-connection to boom.
	Stain and scale removal from spray equipment.	40gm per 10L	Mix PRO-KLEEN GRANULAR in a bucket and scrub stained areas with a stiff brush. Wear rubber gloves.
Sulfonylurea Herbicides (Including: Chlorsulfuron, Metsulfuron, Triasulfuron, Sulfometuron, Halosulfuron, Bensulfuron, Iodosulfuron, Sulfosulfuron, Rimsulfuron, Thifensulfuron, Mesosulfuron).	Spray tanks, hoses, lines and all associated spray equipment.	150-200gm per 100L Please note: 1. Use lower rate when product is used 1-12 months from D.O.M. 2. Use higher rate when product is used 13-24 months from D.O.M.	Steps 1-11. Use same procedure as outlined for non-persistent chemicals above. Step 12. Let the unit stand for 15 - 30 minutes. Step 13. Open spray booms and spray out. Step 14. Repeat steps 1 - 13. Step 15. When sprayer is to be re-used immediately, use the same procedure as outlined for non-persistent chemicals above.
	Nozzles and screens/filters.	20gm per 10L	Use the same procedure as outlined for non-persistent chemicals above.
	Stain and scale removal from spray equipment.	40gm per 10L	Use the same procedure as outlined for non-persistent chemicals above.
Phenoxy Herbicides (Including: 2,4-D Amine, 2,4-D Ester, Picloram, Triclopyr, Dicamba, MCPA).	Spray tanks, hoses, lines and all associated equipment.	250gm per 100L	Steps 1-11. Use same procedure as outlined for non-persistent chemicals above. Step 12. Let the unit stand for 4 - 6 hours. Step 13. Open spray booms and spray out. Step 14. Repeat steps 1 - 13. The solution should be left to soak overnight for an especially thorough cleaning.
	Nozzles and screens/filters.	25gm per 10L	Use the same procedure as outlined for non-persistent chemicals above.
	Stain and scale removal from spray equipment.	40gm per 10L	Use the same procedure as outlined for non-persistent chemicals above.

NOT TO BE USED FOR ANY PURPOSE OR IN ANY MANNER CONTRARY TO THIS LABEL UNLESS AUTHORIZED UNDER APPROPRIATE LEGISLATION.

GENERAL INSTRUCTIONS

This product will generate heat and become unstable if it comes into contact with small amounts of moisture. To avoid hazardous situations please handle this product carefully and observe the following:
a. Ensure that maximum agitation is running prior to adding product to spray tank. b. Ensure that spray tank is at least half full of water before adding product to tank. c. Ensure that the filter basket is removed before adding through top port of tank. d. Ensure that the required quantity of product is measured out using a dry measuring vessel. e. Ensure that product is promptly resealed after required quantity is measured out.

STORAGE AND DISPOSAL

WHEN STORING: Always store in closed, original container in a cool, well ventilated area out of direct sunlight.
Triple or preferably pressure rinse containers before disposal, adding rinsing to wash tub. Do not dispose of undiluted chemicals on site. If recycling, replace lid and return clean containers to recycler or designated collection point. If not recycling, break, crush or puncture and bury empty containers in a local authority landfill. If no landfill is available, bury the containers below 500mm in a disposal pit specifically marked and set up for this purpose clear of waterways, desirable vegetation and tree roots. Empty containers should not be burnt.

SAFETY DIRECTIONS

CORROSIVE. Product is poisonous if swallowed. The product is alkaline. Attacks skin and eyes. May produce severe burns. Will irritate the throat. Do not inhale vapour. Ensure adequate ventilation when using. Avoid contact with skin, eyes and clothing. When preparing and using solution wear elbow length neoprene gloves, face shield or goggles. Do not mix with hot water. Do not mix with other chemicals. Do not mix with different types of chlorinating chemicals. Mix with water only. If product or solution is on skin, immediately wash area with soap and water. In case of spillage, flush with large quantities of water. Wash hands after use. After each day's use wash gloves, face shield or goggles and contaminated clothing.

FIRST AID

If poisoning occurs, contact a doctor or Poisons information Centre on 131 126. If swallowed DO NOT induce vomiting. Give a glass of water. If skin contact occurs, remove contaminated clothing and wash skin thoroughly. If in eyes, hold eyes open, flood with water for at least 15 minutes and see a doctor.

CONDITIONS OF SALE

PRO-KLEEN GRANULAR is supplied as a high grade product and is suitable for the purpose which it is expressly intended and must be used in accordance with the directions for use. Because **Grevilla Ag** has no control over handling, storage or use of PRO-KLEEN GRANULAR, the business makes no express or implied representations or warranty (other than non excludable statutory warranties). This product is sold on the condition that the buyer and/or user assumes all risks of the handling and use of PRO-KLEEN GRANULAR as well as the results obtained from its use.
